

Why Productivity Constructs?

Distribution and Logistics Excellence !

In today's global economy, supply chain management is under tremendous pressure to improve customer service, to reduce inventory levels, to decrease labor and facility costs, and to provide quick response to market changes and demands. Productivity Constructs can help you design your operations to meet these challenges in ways that are faster, more economical, and more effective than your competitors. You already know what the alternative is.

Call Productivity Constructs and set up an initial visit at no cost. We will spend a day getting acquainted with you and your business. By the end of the day we will tell you whether we can provide benefit or not.

Total Team Approach

If your company plans to expand, requires additional space, needs to consolidate, retrofit, or relocate, **Productivity Constructs** can help you make the right decisions. If you're planning a new facility or an addition to your existing one, we recommend meeting early in the process to review architectural drawings. Our complete proposal tells you what we will do, how long it will take, and how much it will cost.

We work with your team, quickly evaluate your operation and get to know your vision which becomes the source for our design. Our operational designs combine the established principles of material flow, storage, and operating systems to give you the most economical solution that delivers the results you need.

By custom-designing something that is uniquely appropriate for you, we can avoid over-elaborate solutions that solve problems by just spending your money. We often deliver solutions that are one half the cost and provide 80% of the efficiency of others. Rarely is the last 20% worth spending twice as much.

Supply Chain Optimization

Does your company need to make improvements to their logistics or supply chain in order to realize the company vision? **Productivity Constructs** has extensive experience and expertise in both areas to guide your changes and improvements.

- ↳ Customer Relationship Management
- ↳ Continuous Replenishment - CR
- ↳ Demand Planning and Scheduling
- ↳ Operational Control Strategies
- ↳ Supply Chain Infrastructure Review
- ↳ Lean Manufacturing
- ↳ Network Optimization
- ↳ VMI
- ↳ Merge in Transit - MIT
- ↳ Forecast Rationalization
- ↳ Vendor Integration
- ↳ Customer Satisfaction Assessment
- ↳ Supplier Relationship Management—SRM
- ↳ Benchmarking - Best in Class
- ↳ Electronic Data Interchange - EDI
- ↳ Supplier Owned Inventory Hub
- ↳ Just-in-time Inventory - JIT
- ↳ Configured to Order -CTO
- ↳ Capacity Requirements Planning
- ↳ Foreign Trade Zone Services - FTZ
- ↳ Import Export Evaluation

Benefits

- ✓Free initial consultation.
- ✓Quality assessment and development of performance metrics.
- ✓Labor optimization, through effective work flows.
- ✓Detailed construction and bid specifications.
- ✓Designed efficiency.
- ✓Experience in the global supply chain.
- ✓No conflicts of interest inherent in vendors and system integrators
- ✓Detailed layouts in AutoCAD
- ✓Specific projections of productivity rates by work function, not just guesses about percentage of improvement
- ✓Flow charts with projected volumes
- ✓Functional specifications for data processing systems
